

# PL-FZ-3000W

## ► Overview

The 3000W Fog Machine is a high-performance atmospheric effect unit designed for professional stage, event, and entertainment applications. Equipped with a powerful 3000W heater, it delivers dense and consistent fog output, ideal for enhancing lighting effects and creating immersive environments.

With multiple control options including DMX, remote, and timer operation, this fog machine offers flexibility for both manual and automated setups. Its robust design and large tank capacity ensure reliable performance for long-duration use.

## ► Product Specification

Item	Specification	Item	Specification
Product Type	Fog Machine	Tank Capacity	2.5 L
Heater Power	3000W	Control Modes	DMX / Remote Controller / Timer
Power Consumption	3000W	DMX Control	Supported
Power Supply	AC 110 / 220V	IP Rating	IP20
Heat-Up Time	Approx. 10 minutes	Dimensions (L × W × H)	67 × 27 × 22 cm
Fog Output	3500 cu.ft/min	Weight	12.5 kg

## ► Feature

- Powerful 3000W heater for high fog output
- Fast heat-up time (~10 minutes)
- High output performance up to 3500 cu.ft/min
- Multiple control modes: DMX, remote, timer
- Large 2.5L tank for extended operation
- Stable and consistent fog production
- Durable construction for professional use
