

PL-FG-3000B

Overview

The PL-FG-3000B is a high-output professional 3000W fog machine designed for large-scale stage productions, concerts, clubs, theaters, and live entertainment events. Engineered with a powerful 3000W heating system, it delivers dense and dramatic fog effects with an impressive output volume of 40,000 cu.ft/min and a projection distance of up to 20 meters.

Featuring DMX control, remote operation, and timer control functionality, the PL-FG-3000B offers flexible integration into professional lighting and effect systems. Its large 6-liter tank capacity ensures extended operation time, making it an ideal solution for demanding event environments and touring applications.

Product Specification

Item	Specification
Model	PL-FG-3000B
Product Type	3000W Fog Machine
Heater Power	3000W
Output Volume	40,000 cu.ft/min
Fog Projection Distance	Approx. 20 meters
Heat Up Time	Approx. 12 minutes
Tank Capacity	6 L

Feature

- Powerful 3000W heater for high-density fog output
- Massive fog output up to 40,000 cu.ft/min
- Fog projection distance up to 20 meters
- Large 6L fluid tank for long operating time
- Supports:
 - DMX512 control
 - Remote controller
 - Timer control
- Creates dense atmospheric effects for stage and entertainment applications
- Ideal for concerts, clubs, theaters, festivals, and large events
- Durable construction for professional use
- Stable and efficient performance in demanding environments

Item	Specification
Control Modes	DMX Control / Remote Controller / Timer Control
IP Rating	IP20
Input Voltage	AC 110 / 220V
Power Consumption	3000W
Dimensions (L × W × H)	75 × 40 × 35 cm
Weight	19 kg
