

PL-HM-600

Overview

The PL-HM-600 is a professional 600W haze machine designed for stage performances, live events, theatres, clubs, broadcast studios, and architectural lighting applications. Delivering a fine and consistent haze effect, the unit enhances lighting beams, laser visibility, and atmospheric visuals while maintaining stable performance during long operating hours. Featuring instant-on heating technology with no warm-up time required, the PL-HM-600 is ideal for fast-paced production environments. The adjustable fan angle allows flexible haze distribution, while DMX, remote controller, and manual operation modes ensure seamless integration into professional lighting systems and touring setups.

Product Specification

Item	Specification
Model	PL-HM-600
Product Type	Professional Haze Machine
Heater Power	600W
Power Consumption	600W
Haze Output	6000 cu.ft/min
Heat-Up Time	No warm-up required
Tank Capacity	1.7L
Fan Angle	Adjustable
Control Modes	DMX / Remote Controller / Manual Control
Input Voltage	AC 110V / 220V
IP Rating	IP20
Dimensions (L × W × H)	52 × 40 × 45 cm
Weight	21 kg

Feature

- Professional 600W haze machine for stage and event applications
- Fine and consistent haze output for enhanced beam visibility
- Instant heating system with no warm-up time required
- High-output performance up to 6000 cu.ft/min
- Adjustable fan angle for optimized haze distribution
- DMX control, remote controller, and manual operation modes
- Suitable for concerts, theatres, clubs, studios, and live productions
- Compact and durable design for touring and fixed installations
- Compatible with AC 110V / 220V power systems
- Large 1.7L fluid tank for extended operation time
